

InSuperior Motorized Screen

Preliminary data

Adeo Screen's innovative in-ceiling model InSuperior, with newly designed casing that can be integrated into a ceiling or false ceiling, features the new tensioning system with double lower bar and patented TFX™ Floating Tab-tensioning system. The weight-efficient structure of this screen can be optimized during installation, eliminating any possible deformation of the roller assembly. This allows the use of more rigid fabrics, in larger sizes, offering the option of longer custom drop combinations. This screen solution also allows a more convenient and quick installation thanks to the improved new installation brackets and the new lateral cover with magnets system. In addition the casing is provided with new safety cables.

NEW InSuperior Motorized Screen - Preliminary Data

- > **NEW** tensioning system with double lowbar
- > **NEW** Aluminum case powder-coated specifically for mounting in plasterboard
- > **NEW** magnets system for the lateral close caps
- > Heads made of galvanized iron
- > Projection surface back drop: (front drop optional)
- > Projection surfaces in PVC without cadmium, fireproof certifications according to the table on page 3
- > Comply with directives: Low Voltage Directive 2006-95-CE and Electromagnetic Compatibility 2004-108-CE
- > Mounting bracket kit for plasterboard included, height adjustable via threaded bars
- > Transmitter included (only for screens with radio-integrated motors)
